One Laptop Per Child Canada

I got a tablet!

We provide 21st century educational tools to Aboriginal students worldwide.

Collaborating with 60+ Aboriginal communities across Canada, and that number continues to grow.

We invest in community based educational initiatives by providing access to technology and bridging the digital divide.

Our program supports: Literacy, Numeracy, Critical Thinking, plus Creativity, and Cultural Knowledge.

We do this with the generous support of our partners: TD bank, Baagwaiting Community Association, Rotary International, Vale, Potash Corp., Nalcor Energy, Canawrap.

Every time we go to a community to present the tablets, the kids are so excited and that makes us excited and it’s just a great program.

We have operations in Manitoba, and Ontario, and in Newfoundland and Labrador and so we’re able to use our partnership with One Laptop Per Child to support Aboriginal youth in all of those communities, and it’s been just a great partnership.

Get kids excited about their education and best of all, bring a smile to a child’s face.

Become a partner, and see the impact you can make.
